**Thank you for collaborating on a research project to address the privacy issues in training autonomous car algorithms**

Dear Anirudh

Thank you very much for collaborating with us on a research project to address the privacy issues faced in training autonomous car algorithms. I appreciate your willingness to take up the challenging topic and contribute meaningfully to pushing the technology frontier towards equitable and trustworthy AI.

Anirudh, you have played a crucial role by investing in possible solutions to address privacy issues and helped us refine the problem space and boundary conditions. Our 7 weeks of collaboration (04<sup>th</sup> April 2022 – 20<sup>th</sup> May 2022) were amazing. We are glad that you are converting the outcome of our collaboration into the “Solving Autonomous Driving Privacy Challenges using Face swapping AI” research paper.

Your expertise in implementing cutting-edge solutions and enthusiasm to learn and explore were cherished. We sincerely appreciate your efforts and

meaningful contribution and thank you for making the collaboration successful.
